

## NOTICE OF INDEPENDENT REVIEW DECISION

July 19, 2002

RE: MDR Tracking #: M2-02-0818-01  
IRO Certificate #: 4326

\_\_\_ has been certified by the Texas Department of Insurance (TDI) as an independent review organization (IRO). The Texas Workers' Compensation Commission (TWCC) has assigned the above referenced case to for independent review in accordance with TWCC Rule §133.308 which allows for medical dispute resolution by an IRO.

\_\_\_ has performed an independent review of the proposed care to determine if the adverse determination was appropriate. In performing this review, relevant medical records, any documents utilized by the parties referenced above in making the adverse determination, and any documentation and written information submitted in support of the appeal was reviewed.

The independent review was performed by a \_\_\_ physician reviewer who is board certified in orthopedic surgery which is the same specialty as the treating physician. The \_\_\_ physician reviewer has signed a certification statement stating that no known conflicts of interest exist between him or her and any of the treating physicians or providers or any of the physicians or providers who reviewed the case for a determination prior to the referral to \_\_\_ for independent review. In addition, the reviewer has certified that the review was performed without bias for or against any party to this case.

### Clinical History

This 44-year-old male sustained a work-related injury to his knee and back on \_\_\_ when he was working aboard ship. A MRI of the lumbar spine, done on 11/10/00, indicated one deteriorating disc. The patient continues to complain of back pain and the treating physician has recommended physical therapy.

### Requested Service(s)

Physical therapy three times per week for three weeks.

### Decision

It has been determined that physical therapy three times a week for three weeks is medically necessary.

### Rationale/Basis for Decision

This patient has a persistent history of intermittent symptoms of varying degrees, referable to the back and similar to the complaint experienced subsequent to the injury of \_\_\_. Episodes of pain and sciatica associated with some numbness have occurred. The continuation of this clinical picture, as noted above, indicates that the patient should receive the care proposed. Therefore, physical therapy three times a week for three weeks is medically necessary.

This decision by the IRO is deemed to be a TWCC decision and order.
